

Konftel 300 series

– conference phones for all your meetings

Productive remote meetings require a conference phone that is easy to use and delivers high audio quality. The models in Konftel's 300 series are very similar to one another on the outside and several significant features on the inside of the phones are identical. OmniSound®HD delivers audio quality with HD sound, and for starting meetings, there are helpful features such as a conference guide, phone book and storage for meeting groups. Moreover, several of the models can connect together calls from different connections or lines.

Other smart features that provide added value for your meetings include the SD card recording feature. Record calls or dictation on the memory card and play, save or share.

Think through how you want to meet to find the model that's best for you. Landline or wireless, small or large meetings. Regardless of which you choose, you'll be very impressed by the outstanding audio quality.

COMMON FEATURES IN KONFTEL 300 SERIES:

- Several connection options; analog, SIP, USB for VoIP as well as wireless DECT and cellular
- OmniSound®HD – superior audio quality
- The conference guide helps you to make conference calls and store meeting groups

OMNISOUND® HD – SUPERIOR AUDIO QUALITY

The patented audio technology OmniSound® guarantees that your remote meeting will have impressive and crystal-clear sound in both directions – full duplex. Hypersensitive microphone with 360° sound pickup and speakers that provide powerful sound distribution to all participants.

OmniSound® HD delivers **HD sound** for VoIP calls. Also equipped with automatic **echo cancellation** and **noise suppression** that minimizes background interference as well as an **equalizer** for personal adjustment of audio properties.

Move freely around the room, talk, discuss and debate with retained sound quality that is entirely free from irritating sound clipping, damping or echoes. It's as close as you can get to natural sound.
