

SABRE™ RANGER M2M

Ruggedized BGAN for Remote SCADA Applications

The SABRE™ Ranger M2M is a BGAN M2M (machine-to-machine) terminal with a ruggedized mechanical enclosure build for long term outdoor all weather installation. It is designed for SCADA applications in remote unmanned location. The firmware is specially designed such that it can provide reliable and stable BGAN connectivity continuously for long period without user intervention. To ensure that users are always in control of SABRE™ Ranger M2M, Addvalue developed features that enable users to control the terminal remotely: the PDP context of the SABRE™ Ranger M2M can be activated or deactivated remotely via SMS; in times when users need to reboot the terminal, the rebooting process can also be initiated via SMS; the terminal can be configured remotely using SMS commands; and logs can be retrieved remotely for debugging. The SABRE™ Ranger M2M also comes with a mounting frame that's specially designed for easy antenna pointing.
