VOICE FAX GATEWAY
QUICK START GUIDE

Thank you for purchasing our device! We hope it will satisfy your expectations and you will enjoy its particular features. Please, find few minutes to read the Quick Start Guide before starting the work. It will make the installation and usage of the device easier.

i INTRODUCTION

Voice Fax device is created correspondingly to up-to-date telecommunications and electronic technologies. The Voice Fax emulates the line. Facsimile messages and/or phone calls in GSM network can be sent and received using analogue fax and/or phone connected to the device. Voice Fax device gives a user exclusive possibility to change parameters of the device with ordinary telephone using Voice Fax Service menu.

i PACKAGE CONTENTS

- Cardboard box.
- Voice Fax Gateway device.
- AC/DC power supply adapter.
- External GSM antenna.
- Quick Start Guide (this document).

Note: the manufacturer does not provide a SIM card among other items of the package, which is necessary for connection to GSM network! You can obtain a SIM card from your local GSM service provider!

ℹ HOW TO START?

Before powering on the device make sure:

- SIM card is inserted (Step 1)
- Antenna is connected (step 2)
- External fax device or telephone is connected to the „PHONE" or „FAX" socket (Step 3 and Step 4)
- Power supply connector is inserted into „DC" socket (Step 5)

When the device is set to work, that is, SIM card inserted, antenna, external fax device connected to line and power supply are connected, the Power LED lights on. The startup can take up to 20 seconds (it is recommended to wait). During that time, the module checks the SIM card, detects the appropriate GSM network and checks the working parameters.
